5 **Takahashi Yoshihiko (tentative title)** Exhibition Period Changed Exhibition Room 3 [3F]

2021.3.6 [Sat.] ▶ 2021.6.22 [Tue.]

Takahashi Yoshihiko (b. 1958) produces works using a variety of methods, based on properties and textures of glass intuited in his practice. In his hot work especially, smooth surfaces and flexible forms capitalizing on the motion of melted glass make for pieces of enigmatic appeal that in their sheer tactility inspire the viewer to flights of fancy. This exhibition takes a close up look at the fascinating work of an artist eminently skilled at coaxing out the myriad aspects of glass.
